Varicella titer is a blood test for antibodies to Chickenpox. We are finding that even if a student had Chickenpox, he may not have the antibodies to protect him from the disease as an adult. The blood test is necessary if students cannot document the 2 vaccines. If the test comes back negative then the student must have the 2 vaccinations prior to entering a clinical area. You may obtain further information from the web site: CDC.GOV. Click on V-Varicella. Please allow two months prior to clinicals to begin the blood testing process.
